

Who is Aon?

We base our approach to the Aquaculture Industry based on 3 criteria; Knowledge, Experience and Competence.

Knowledge: We know the insurance markets, the aquaculture sector and their needs.

Experience: Nearly 40 years of experience within the sector

Competence: Leading inhouse expertise. Aon have experts with very long expertise and strong competence related to several aspects like biology, engineering, RAS and finance.

What do we do?

Aon can deliver solutions to our Aquaculture clients for all lines of insurance needed to protect the companies against losses to both physical and biological assets, employees, supply chain, receivables, liabilities etc. In addition, we can deliver risk consultancy services for this sector.

What is Aon's view on the risk landscape

Land based farming

Benefits:

- Biosecurity
- Waste control
- Technology

Challenges:

- Lack of appetite among insurers
- Potential high values at single sites, lack of capacity in the insurance market
- Complex technology
- Competency among the workforce

Offshore based farming:

Benefits:

- Experience
- Production in natural habitat
- Cost

Challenges:

- Environment/global warming
- Waste
- Biosecurity
- Control losses
- Fish handling/treatment

Aon utilize all global resources to meet increasing demand from new developments in farming.
