2021

MOWI®

Leading
the Blue
Revolution

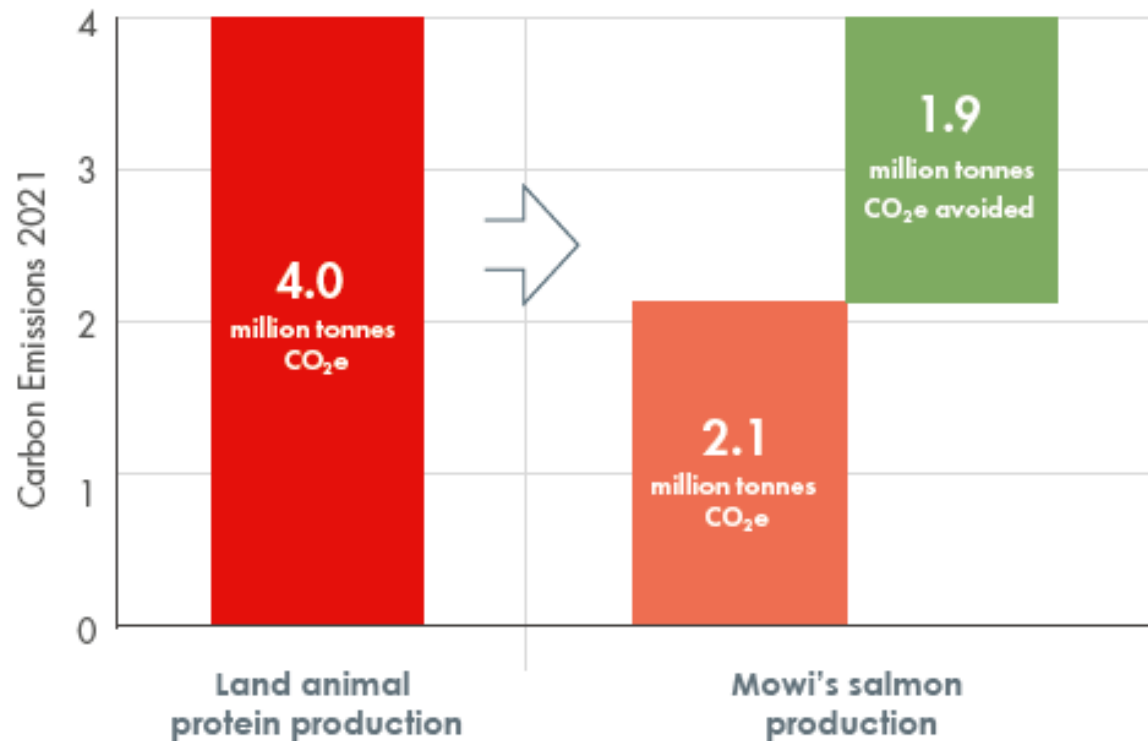

• Blue Foods: triple win (people + planet + economy)

• The impact of dietary shifts

GHG Emissions

1.9 million tonnes CO₂e emissions are avoided annually by replacing the corresponding amount of land animal protein production.

1.9 million tonnes
net avoided CO₂e emissions

Equivalent to approx.

421 000 cars
removed from the road every year

• Mowi's decarbonization journey:

SBTi

Climate targets aligned with Paris agreement

8%

GHG emissions reduction

25%

Renewable electricity

70%

Of sea sites in Norway connected to land power

8

Hybrid generators installed at sea sites in Norway

96%

of waste at processing plants not sent to landfill

100%

Deforestation-free soy

72%

of plastic packaging recyclable, reused or compostable

Key partnerships:

Sjømat Norge, seaBOS, SAFA
